

Regulatory Filing Calendar

Northgate Financial Services · Internal Reference NGF-COMP-011 · Version 2.1 · Owner: Regulatory Affairs · Review cycle: annual

1. Purpose

This calendar sets out every recurring regulatory filing Northgate Financial Services submits, the owning function, and the deadline relative to each reporting period. It supplements the individual policies that describe how each filing is prepared; it does not replace them.

Missing a filing deadline is reportable to the Board Risk Committee within one business day of discovery, regardless of whether the filing is later submitted late or waived.

2. Prudential and capital filings

These filings are prepared by Finance and reviewed by Regulatory Affairs before submission. All deadlines are calendar days after the period end unless noted.

Filing	Frequency	Deadline	Owner
Capital adequacy return	Quarterly	15 days after quarter end	Finance
Liquidity coverage report	Monthly	10 days after month end	Treasury
Large exposures return	Quarterly	20 days after quarter end	Risk
Recovery plan update	Annual	31 March	Risk

3. Financial crime filings

Suspicious Activity Reports have no fixed calendar slot: they are event-driven and governed by section 4 of the Anti-Money Laundering Policy, which sets a 24-hour internal escalation window. The filings below are the periodic ones.

Filing	Frequency	Deadline	Owner
High-risk client review summary	Quarterly	10 days after quarter end	Financial Crime Compliance
Sanctions screening attestation	Annual	31 January	Financial Crime Compliance
Training completion return	Annual	31 January	Learning and Compliance

4. Conduct and client money filings

Client money reconciliations are performed daily and are not separately filed, but the quarterly attestation that the reconciliation process ran without a material break is a formal filing owned by Client Operations.

Filing	Frequency	Deadline	Owner
Client money attestation	Quarterly	10 days after quarter end	Client Operations
Complaints return	Semi-annual	30 days after period end	Compliance
Product governance review	Annual	30 June	Product

5. Late or missed filings

A filing owner who anticipates missing a deadline must notify Regulatory Affairs at least five business days in advance wherever the delay is foreseeable. Regulatory Affairs decides whether to pre-notify the regulator or file late without warning, based on the materiality of the filing and the firm's engagement history with that regulator.

Every missed deadline, foreseen or not, triggers a root-cause review by Regulatory Affairs within ten business days, with findings reported to the Audit Committee at its next scheduled meeting.
